

Glass buildings with *Intelligent* underfloor air conditioning and ventilation

New and refurbished office buildings benefit from using Protek's *Intelligent* Underfloor Air conditioning and ventilation:

- Bespoke energy efficient integrated system.
- BMS included.
- Reduced overall project program.
- Reduced overall project cost.
- Increased lettable space.
- Prefabricated, tested and pre-commissioned at point of manufacture.
- No co-ordination problems in ceiling voids as the system is installed in the raised floor void, with no ceiling void installation.
- Little or no ductwork, reduced need for risers, site labour and minimal pipe work.
- Simple installation, plug and play system.
- Minimum 40% saving on energy consumption.
